

A photograph of a middle-aged man with short grey hair and glasses, wearing a light blue button-down shirt. He is sitting in a dark armchair, looking intently at a silver laptop screen. His right hand is resting on his chin, suggesting deep thought or concentration. The background shows a window with a metal frame and a white wall.

A partnership to empower learning, knowledge, and **enhanced outcomes**

The Homecare & Hospice Association of Utah (HHAU) is excited to announce a new education partnership with WellSky® Services. WellSky offers highly accessible certification courses, empowering your team to demonstrate their proficiency, enabling your organization to stand out amongst the competition.

The value of WellSky's Board-Certified Home Health Coder course

Certifying your home health coding proficiency is an important step in your career as a home health coder. It is a tangible validation of your education and expertise – clearing demonstrating your value to your team. Through certification, you can gain the trust of colleagues, rise in your profession, and demonstrate leadership in the field.

The experts at WellSky developed the Board Certified Home Health Coder (BCHH-C) course to serve as an accurate measure of an individual's proficiency in home health coding. Participants will gain a comprehensive understanding of ICD-10-CM and OASIS concepts by completing the eight-week preparation course.

Expertise in the major areas of coding competency

During the BCHH-C course, participants will become experts in the four domains of coding: coding, regulatory, health information documentation, and OASIS. During the course, participants will learn how to code real patient scenarios, including how to read and interpret physician documentation to properly code conditions using the ICD-10-CM coding manual.

By the end of the course, participants will be able to:

- Understand how to properly use the coding manual for codes in all chapters
- Locate coding guidelines
- Properly assign ICD-10 codes to specific patient scenarios, including the primary diagnosis and sequencing of secondary codes

The unique benefits of WellSky's BCHH-C Certification course

WellSky's BCHH-C course allows coders to become certified in a way that is affordable, comprehensive, and convenient. The eight-week BCHH-C preparation course and exam are offered online, eliminating travel expenses, and encouraging participants to learn at their own pace.

Each week, a new module opens, providing participants with videos, practice activities, and discussions that empower comprehensive learning. Each module lasts approximately one-to-two hours per week and can be reviewed as needed.

BCHH-C participants receive access to:

- An eight-week preparation course
- A practice exam
- A proctored certification exam

Home Care and Hospice Association of Utah members can **save 25% on registration** when they use promo code **hhaubund20**

Promo code valid through December 31, 2020.

Elevate your career with WellSky's OASIS certification

The OASIS Assessment is part of a home health agency's routine. This assessment collects all pertinent information relating to a patient's health and functional status, providing the data necessary to measure patient risk factors and outcomes – all of which lets Medicare know what care is being delivered and why. Its completion impacts an agency's patients and the agency itself.

To demonstrate the value of care delivered at your home health agency, you must complete the OASIS accurately. To demonstrate your proficiency, and OASIS certification is a necessity.

The unique benefits of WellSky's OASIS certification

WellSky's Certified OASIS Quality Specialist (COQS) certification course provides comprehensive training on the OASIS assessment. The COQS course reviewed and psychometrically analyzed by industry leading OASIS experts each year, ensuring the exam accurately measures OASIS proficiency.

By the end of the course, you will be able to complete the OASIS in an accurate and compliant fashion, which is critical to protecting your agency's quality score.

The course consists of eight interactive learning modules. Each interactive learning module features a combination of presentation videos, practice activities, and discussion with course colleagues. WellSky's affordable, comprehensive, and remote course is a convenient way to earn your certification.

With WellSky's COQS bundle, you'll receive:

- Access to gold-standard, online preparation lessons
- A printed OASIS-D1 Field Guide
- Access to a 100-question, online proctored certification examination

Promo code valid through December 31, 2020.

Demonstrate your case management proficiency

Home health and hospice case managers are the links connecting patients and their families with physicians, nurses, social workers, and other caregivers. The case manager is an instrumental member of the agency's team as they work to formulate treatment plans, keeping interdisciplinary team management and clinical best practices top of mind. As home health and hospice continues to evolve into a value-based, patient-centric, coordinated model of care, agencies will need well-trained, knowledgeable case managers.

The unique benefits of WellSky's case management certifications

WellSky's Certified Home Health Case Manager (CHHCM) and Certified Hospice Case Manager (CHCM) courses are the only industry specific case management certification courses available today.

Both home health and hospice professionals can register for our online, International Association of Continuing Education and Training (IACET) accredited case management preparation course. Participants can take the home health learning track, the hospice learning track, or both. The preparation course prepares participants by explaining the regulatory and reimbursement landscape, diving into patient-centered case management best practices, and documentation requirements, providing participants with a comprehensive, industry specific look into case management.

The course consists of eight interactive learning modules. Each interactive learning module features a combination of presentation videos, practice activities, and discussion with course colleagues. WellSky's affordable, comprehensive, and remote course is a convenient way to earn your certification.

WellSky's case management bundle enables you to earn both home health and hospice case management certification. Our bundle includes:

- Access to an eight-week preparation course
- Access to one certification exam
- The ability to upgrade to a second certification exam for a reduced fee
